He talked about the Ebola virus which in mainly overseas and Enterovirus D68, which has affected people in West Virginia, 4 cases. He added none in the immediate area. Lloyd also added that the Health Department will be giving flu vaccines at all of the local senior citizen centers and will go to any business who requests the service and the only cost is that of the vaccine for business. Lloyd also added that the Health Department is reviewing preventative care measures that could assist local residents in not getting ill. Lloyd added that the reason for this is that there has been an increase Medicaid recipients and a drop in medical providers and this could possibly lead decrease in service to those individuals or a longer wait. He believes that preventative care could assist local health care providers as well as residents with that assistance.*
